## Getting Started

The following are available in the tool bar on the main screen. In this page, users can understand what those are used for, and then can operate them exactly.

### Menus

- [Usage](#): Displays current system usage in both graph and by numbers.
- [Optimize](#): Offers a smart and efficient feature for optimizing memory. It can optimize memory properly and efficiently, and helps the system run smoothly.
- [Upgrade](#): Users can upgrade their hardware to increase memory. (This feature is only available when installing PC Brother System Care Pro.)
- [Logs](#): Offers a list for users to get detailed optimization information. Users can set time range to display the optimization details.

## Usage

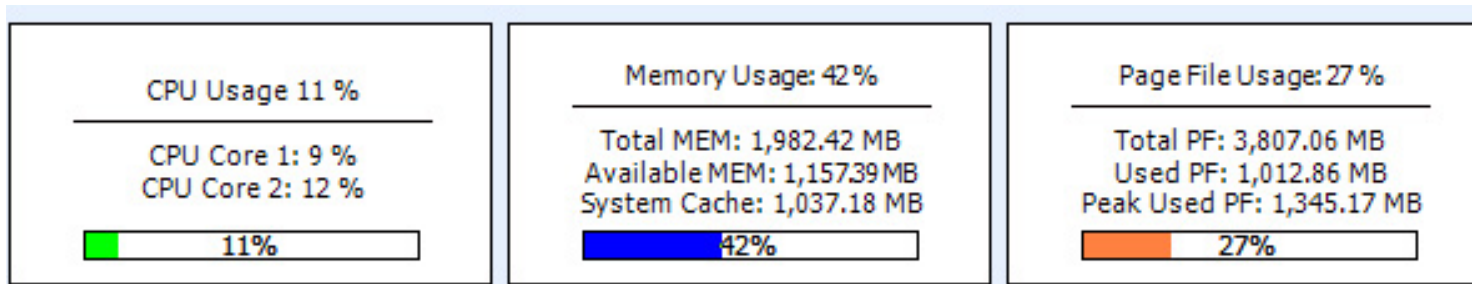

Run **PC Brother Memory Optimization Free**; then choose the **Usage** tab.

**Usage:** Displays current system usage in both graph and by numbers.

### Graph

1. Select CPU, MEM (Physical Memory) or PF (Page File) to show dynamic state in graph.
2. Each item can be clicked to display in the graph at will.

- Show details of each item, such as total usage, available usage, etc. These can help users analyze data and make a decision to free memory or upgrade hardware.

## Button

Click "Free Now" to optimize system.

If you have any questions about our application, please feel free to contact us: [support@pc-brother.com](mailto:support@pc-brother.com)

## Optimize

Run **PC Brother Memory Optimization Free**; then choose the **Optimize** tab.

**Optimize:** Offers a smart and efficient feature for optimizing memory. It can optimize memory properly and efficiently, and helps the system to run smoothly.

Latest optimization report: available memory: 1,207.86 MB -> 1,364.23 MB, increased: 156.37 MB.

**+ 156.37 MB**

1. Free memory each time by clicking button "Free Now".
2. The latest optimization report will displayed after optimization.

- ★ Enable smart optimizing to automatically tune up memory resources.
- ★ Enable automatic optimization when available memory falls below a certain level.
- ★ Temporary disable automatic memory optimization when CPU usage goes above a certain level.
- ★ Tune up memory to optimize system appearance and performance.
- ★ Tune up CPU assignment for better utilization of CPU resources.
- ★ Optimize memory now.

- Each item will be optimized after clicking button "Free Now", and stars in front of each item will be filled while finishing optimizing.

## Logs

Run **PC Brother Memory Optimization Free**; then choose the **Logs** tab.

**Logs:** Offers a list for users to get detailed optimized information. Users can set time range to display the optimize details.

Time	Operation	Result
2010-7-19 15:43:27	Memory was optimized manually.	1,087.93 MB -> 1,100.09 MB, +12.16 MB.
2010-7-19 15:43:09	Memory was optimized manually.	1,083.06 MB -> 1,097.38 MB, +14.32 MB.
2010-7-19 15:43:01	Memory was optimized manually.	1,084.83 MB -> 1,095.60 MB, +10.77 MB.
2010-7-19 15:42:50	Memory was optimized manually.	1,048.91 MB -> 1,097.35 MB, +48.44 MB.

1. Users can set time range here to display optimization report, and still can delete current displayed reports by clicking "Delete Logs".

2. After setting time range, the detailed optimization report will be displayed here to show you the time, operation state and result.

# Company Information

## VeeCan Software Ltd.

**VeeCan Software Ltd.** is a leading PC company specializing in the technology of PC protection and optimization. We are one of the first PC optimization companies to offer hardware maintenance service, and make it possible for users to optimize their PC system and download their desired software simultaneously.

We are dedicated to thinking helping our customers through comprehensive evaluations of the using habits of computer, as well as through the authoritative websites' edit report. VeeCan helps both experienced and beginner customers, who want to make the most of their PC systems. We provide our customers with solutions optimizing their computers and also offer additional valuable services to our customers.

## Frequently Asked Questions

### The most frequently asked questions are as follows

1. How to use PC Brother Memory Optimization Free?\_  
[Answer](#)
2. What is the benefit of using "PC Brother Memory Optimization Free"? \_  
[Answer](#)
3. I have attempted to download the software many times, but each time the downloaded file is bigger than the file size listed on the web site. Why am I having this problem? \_  
[Answer](#)
4. Do you sell a version of PC Brother Memory Optimization Free for the Mac? \_  
[Answer](#)

### How to use PC Brother Memory Optimization Free?

Just click the button "Free Now" can easily free your memory, and system usages are displayed in both graph and numbers automatically.

### What is the benefit of using "PC Brother Memory Optimization Free"?

"PC Brother Memory Optimization Free" offers user a smart and efficient feature of PC Brother Memory Optimization Free, it can optimize memory properly and efficiently, and helps the system to run smoothly.

It can do the following:

1. Display current usage of memory resource on an easy to read graph;
2. Monitor memory resource in background, and smart PC Brother Memory Optimization Free;
3. One-click optimize and convenient hotkey operations;
4. Enable a "Do-Not-Disturb" setting when for when users are enjoying a game or movie.

**I have attempted to download the software many times, but each time the downloaded file is bigger than the file size listed on the web site. Why am I having this problem?**

This problem seems to occur only when using a download manager with specific network conditions. If at all possible, you will have better results by downloading the software normally through your browser.

**Do you produce a version of PC Brother Memory Optimization Free for the Mac?**

No. PC Brother Memory Optimization Free Soft Development Team does not develop Macintosh software at this time. Unfortunately, as we are not familiar with the Macintosh software market, we do not know of a solution to recommend for similar operations on the Mac platform.
